

Save up to 30% on Cytiva® and Whatman® brand products through Government Scientific Source*

The Whatman GD/X™ Syringe Filters are designed to enable easy filtration of hard-to-filter samples up to 10mL.

Available in a wide variety of filter choices with polypropylene housing.

The Whatman Vacu-Guard disk filters protect pump system from water intrusion.

Utilizes the most advanced construction methods and design features available today.

Whatman® GD/X Filters Whatman® Vacu-Guard Filters

Cytiva® RNAspin 96

The Amersham RNAspin 96 kits support a high throughput approach, whether samples are processed under vacuum, using centrifugation, manually, or with automation. The on-column lysis for small amounts of sample improves efficiency by avoiding mechanical homogenization.

Cytiva has developed a kit incorporating its magnetic bead based technology (Sera-Xtracta™ Virus/Pathogen Kit), for the isolation of viral/bacterial nucleic acids (RNA and DNA).

Cytiva® Sera-Xtracta Virus/Pathogen Kit
